Fuel Policy

October 2008

Volatile World Oil prices mean we either need to continually re-negotiate our haulage rates or align our fuel surcharge policy across the board. Please see below our Fuel Surcharge mechanism, based on average UK diesel costs for the previous month.

Our surcharge applies for a complete calendar month and is based on delivery date NOT the collection dates of consignments.

Most of our tariffs are based at **82 ppl**, therefore the following table will apply from **1st October 2008** for UK/European Services. Some tariff base rates may differ

The prices quoted are for road diesel. We use our own delivered average price for bulk diesel purchases as this will normally be less than independent sources. We guarantee that our average price will not be greater than the UK average price posted monthly by the AA on their website. This report is available at www.theaa.com/motoring_advice/fuel
